What I disliked the most about the experience of learning online:

No other kids with me
my internet issues.
I can't raise my hand and have the teacher give me a 101 convo on how to do it.
I miss seeing my teachers and friends.
dislike to take a lot of online classes because it can be due like one day to 4 days we want to take time for our perspective
Online work is harder.
trying to see people with bad bandwith
I miss seeing people in person.
No friends
It is boring, I like going to school better.
Being more left out and alone than in school.
That there is so much work.
I feel more left out than usual.
If there too many people in the group then things start to get lagging.
I still have to do school at home.
Math
Not being able to be with the teacher and friends in person
Voices are crackly sometimes
they give us more work online then if we were in school. Most of the work they give us is hard.
Not de ing a dl to see my frens.
Sometimes people get removed from the meeting.
Some students' microphone are harder to hear than others. Sometimes, the captions are not correct and
It is very difficult to follow the teacher and the classmates during meeting . When slideshows are presented , hard to see the teachers signing in the corner of the screen. It's is hard to see how signs at each time and who talks to who. Asl uses the whole body and a lot is missing when the signer is on a screen . I get very very little benefit from distance learning. There is more frustration than follow the conversation . Internet also is an issue and the image frizzes often which makes my understanding impossible. It'a been an awful experience. Deaf students need to be in the classroom , socialize , chat with other Deaf friends in person. This has put a lot a
Miss friends
Seeing my friends & clubs
That I didn't get to see my friends.
Too infrequent, inability to talk freely
Everything
A lot of teachers post more than necessary
Not having hands-on activities.
I meet every week instead of every other week. I like to sleep late!
Don't like work load
Teachers not considerate of my time
What I disliked the most about the experience of learning online is no immediate communication with some teachers if you have questions.
Still not understanding
Seeing and talking to the teacher in person makes more sense to me.
didn't get to do it
I disliked the static in the background from my computer mic.

Sometimes it is hard to hear other students when they talk. Sometimes there is background noise from the students. I don't like showing my video. Kids goof off in the breakrooms on Zoom and it is annoying.

I can't work with my friends. I can't ask my teacher a question right away.

Not using iPad apps

is that sometimes its to much work for spanish and i get overwhelmed. she would not give me access to do my work and i kept asking her and my last email i sent her then she gave me access to do my work.

Missing the social aspect of seeing/talking to my classmates and teachers

My iPad glitches and doesn't work well sometimes. There is a lot of noise at home and online if the teacher doesn't mute everyone.

Not everyone was able to have access to good microphones within their devices or they had background noise around them when they spoke which made them more difficult to understand

Not being able to talk and see my Math and Biology teacher.

talk to friends in facetime.

There's nothing that I don't like about online learning.

It felt weird.

can't see my friends, I can't talk to them, I can't see or talk to my teachers

I really don't have an opinion on this.

Not captions is all classes.

To much work

Not seeing my friends

The thing I dislike the most about remote learning is not seeing my friends and not being able to interact in person with them. I miss not being to interact with my teachers face to face, too. This is my 8th grade year and I feel like I'm missing a lot of experiences that I should be having. I think that remote learning will make my transition to high school harder.

I don't get to see all my friends at school.

The videos can lag.

I missed seeing friends.

I don't like people have a freeze on zoom

Not being able to see my friends, getting my work done

YOu can't just ask a question you need to email the teacher and it takes time for her to respond. If

How much more difficult it is compared to being in class learning.

The time that the assignments were due.

I miss my friends and teachers. It is lonely being home and away.

I like seeing my teachers and classmates in person.

The online part

There is way more homework than when I was in school. Also I am missing my senior year experience :(

What I dislike is that many of the teachers can as well overwhelm us with big homework assignments, such as essays and projects.

I dislike that I have to sometimes meet up with my teachers and how some of the words my teachers use his hard for me to understand what there trying to say.

I don't like how we have to do all are work on a computer and stare at a screen most of the day but I take time off to go outside and some other stuff away from the computer.

math

i did not get to see my friends in person

Sometimes your software doesn't work

Feel like I have to teach myself. More distracted at home.

I don't dislike anything about it.

I liked it all

harder to follow/keep track of assignments, miss seeing people face to face

I don't dislike anything, keep it the way it is

Actually, I like it because people can be muted.

Not being able to communicate withe everyone and having everything online.

It's more difficult to understand the material when a teacher isn't explaining it to you. It's like getting a crash course through a video.

I miss seeing my friends.

to much work

I disliked the normal routine going to school by bus and experiencing school at the school building.

That I had to wake up early to join zoom

teachers expects more out of us (ex. one day assignments, difficult questions)

I dislike being at home. It can be hard to focus while doing your homework.

Had to work with parent

i have google meet alot

I don't like doing distance learning.

Missing thing that people said and internet problems

I like school better. It's boring being at home.

All of it. More homework.

I still have to wake up really early. The teachers give us to much homework - since we are not at school they think we aren't doing anything so they stack us with too much homework.

Getting a lot of assignments and needing help.

It was hard to understand when everyone was talking.

technical problems, freeze screen

not seeing friends and not hearing everything

Noise from other student's computers

We were not able to meet and give individual attention as one to one hands on experiences on their projects/papers/assignments.

When everyone talks at once. It is so annoying and people are all chatting about different things.

I can't see anyone

if I'm not understanding something I can email but I still may not understand

Reading...

It was not fun not to be with my classmates.

I would rather be able to see the person face to face.

SCHOOLWORK!

Not being able to see my friends.

Headaches, tired eyes, exhausted

It is harder to to listen and to stay focus on what is being said

That I couldn't get out of the house to go see people.

I don't like trying to figure out who is talking when

I dislike that I can talk to my teachers face to face.

My school's system has very little structure, and I miss that- and online class discussions are really weird and a bit harder to participate in, and I don't like that.

I didn't like having to share a computer to get my work done.

i wasn't able to get hands on learning

I don't like the sign in experience of zoom, first accept and sign in and wait and then it would freeze up sometimes and we have to repeat.

Can sometimes be hard when everyone talks at the same time. Hard to stay organized assignments.

Some teachers muted me because I talked too much!

i don,t have anything to say i don't like

Miss my teachers and students. can't always hear.

I disliked when I only received assignments from my teachers, and didn't see them.

Many teachers are not very good at using the online resources provided.

Having appointments with some teachers but not seeing the benefit or the point of the meeting.

You can't see your teacher in person if you don't understand work.

I disliked not having easy access to help online. Most of the time the video quality was not great.

not seeing my friends and turning in the work without knowing if it is right or wrong No feedback from teacher

I can not read lips as well.

Teachers have been inconsistent about the way they teach us and the amount of work they assign. Some teachers have office hours, some don't. I have been able to get my questions answered promptly from some teachers, and others I have had to wait several days or send several emails following up. Some classes seem like there is too much work, and some classes seem like there is too little and I am not learning much. I am missing interactions with classmates as well.

Missing how I learn in class and missing my friends.

Sometimes the camera froze up or it was difficult to hear. It got better but it still made things a little annoying.

Not being in school

Most teachers don't have captions or I can't see their faces.

When teachers assign to much work or when they don't explain things thoroughly.

No motivation

Can't be with friends

The work assigned

Having questions and my mom was busy.

Having questions and having to wait for my teacher to answer in email.

Not being near other people in class and being on a computer all day long.

The amount I have to do in one day.

not communicating with ASL teacher

When you try to play a games with other people and the internet is down and you try to fix it when you fix it everyone is like halfway through the game.

I miss my friends

Sometimes the computer freezes.

How some assignments may not work, but work next time.

some videos dosnt have captioning

You can't ask questions and get the answer quickly. You have to message the teacher to ask questions. The videos don't give enough explanations.

missed friends

I don't get to see my friends.

I dislike the most about learning online is that some teachers either give to much work or increase the work's difficulty and my brothers annoying me when I'm trying to work and they are done with their work or taking a

How overwhelming doing a lot of the work is.

Working hard just by myself on the homework.

There are alot of people in Google Meet and it makes me hard to learn. Like I don't hear what the classmates are saying and sometimes my teacher(s). I don't like to have Google Meets every day.

NON

The morning sessions are too early for me (10:00AM).

I disliked not being able to get help in person and having the teacher be able to physically look at your work.

I disliked the fact that I wasn't there in person learning with my classmates and teachers.

I dont get to see my friends and all I get to do all day is do school work on my computer.

Students have black screens on.

Most students do not talk and answer questions when asked during online discussions.

not motivated at all

miss people interactions

it was boring.

being at home and the distractions. Hard to concentrate at home.

That we don't have specials (art, music, pe)

It was difficult to follow along

nothing works

the amount of work assigned

Sometimes there are computer problems.

Looking on the screen the whole time

I don't know

If math or biology work are too hard i can t find help quickly and had to wait.

We got a lot of assignments fast because we were only in the class like 2-3 times per week so I would feel a little overwhelmed. I also would get unmotivated pretty fast and wouldn't want to do it.

Less directions, harder to ask questions

Boring when everyone is muted. Can't talk to my friends.

Not getting work done

none i don dislike anything

teachers just give us work with not as much explanation, so less learning. Mostly feels like busy work.

Not sure.

Not with friends - not in school.

Captioning for certain classes really didn't work - especially learning in another language.

they expect us to know how to do it when its brand new to us

It is online

Tech problems

The legs and all that.

I didn't like how most of the time there were technical difficulties and because of that I was easily lost in the School work.

Unable to see the other students and difficult to understand questions at times

I don't like having a friend in case I miss somethiing. I depend on them to help fill-in the gaps.

I don´t have any dislikes about E-learning. It´s really interesting and really fun when I get used to it!

slow screen

I disliked how other students were not participating. They didn't turn on their screen. I felt left out.

You have to wait for teachers to respond.

Lack of motivation to complete work

I didn't get to see my classmates/friends.

the work is harder

its harder to hear

Nothing.

When there are videos, most teachers don't give out videos that are captioned.

I don't get the help I need

I disliked everything.

There's nothing that I didn't like about it. I liked on-line learning!

My mom is a teacher, and she is always on top of making sure I get my homework done.

It seems like every assignment is a big project and more work.

The fact that I have to wake up early to go to class.

Captioned videos didn't always work

It sometimes gets boring because there are no science experiments because we don't have the materials

Both

Not seeing my friends.

I miss doing projects with drawing.

No social interaction.

not getting to see anyone in person

Not being able to work with my classmates in groups.

I dislike that we are online learning is that we are not able to see our teacher everyday and be able to talk to them right then and there when i have a problem with my work.

Not as much help with assignments and I didn't get to see my friends.

The teachers aren't always available

everything

missed socializing with friends

Doing the assignments.

harder to do assignments / watch presentation and see interpreter at the same time

did not like the school work - not used to this presentation.

the amount of work sometimes felt like more than when we were in school.

connection issues

A lot more work

The screen starts lagging sometimes.

not being in class with my friends

when people keep talking

Group online discussions with everyone talking at once and feedback.

Very little. The internet breaking up sometimes is less than ideal, but not that bad at all.

When teachers typed up instructions, it was sometimes confusing. Also, it was harder to understand in groups in classes.

Distracted by my brother! Annoying me!

There was a lot of work to get done.

sometimes I got confused and had to message my teacher

I HATE THE ZOOM CALLS!!!!!!!!!!ii

The part i dislike about learning online is that i can't see you face to face.

The lack of being able to talk with friends

i like all

all, no discussions, difficult understand

Access is very different.

Also have visual accommodations so online is challenging .

Captioning / interpreter/ teacher / classmates all on a small screen.

Didn't attend a lot of zoom opportunities because it's a lot of planning and work to attend / participate. Missing a lot more this way.

Easily distracted.

It was hard because of the fact that I didn't really understand what I had to do when I was working online comparing to when I'm at school, I could understand better

I didn't like when I didn't understand something it was hard to ask questions

Not being able to participate and hear other students ideas.

lack of understanding and I prefer going to school than online schooling

I did not like physically seeing my friends and teacher, but we all need to do it for the sake of humanity.

I think it would help if closed captioning was always available. Sometimes the teachers glitch so you miss what

I have to work by myself, there's less support.

not being with my friends

Felt like there was more work given than in regular school. Also, had a difficult time concentrating.

There was a lot of busy work.

Hard to connect with teachers sometimes - office hours were the hardest because it wasn't structured and there was a lot more noise.

Not always understanding and not always understanding what is being said.

Not having the teacher in front of the class teaching face to face ,because I fund myself learning better that way, and having to email teachers because sometimes it was hard to explain over email.

I don't get my questions answered as fast. Resources are limited. More independent.

Reading. Missing my friends. I do some zoom meets.

not able to understand things as well and not enough time for bigger projects

I don't have any dislikes on online learning

How intense the work could be sometimes

The lack of accommodations

its all fine I guess.

Sometimes the teacher (math) is unclear about instructions like on gc they say to do a particular page number and then on the slides it says you don't need to. Other teachers are fine but sometimes they give a ton work

I can't meet with my specials teachers and do their activities in a fun way.This is the same with my classroom teachers and my ToDHH.

that sometimes the screen be frozen

Prefer to be in the classroom vs. online. Liked having examples in class. Hard to see online and hear online. Hard to navigate the online system and figuring out what you are supposed to do for the week.

that it wasn't the same as in person

Not seeing my friends and teachers

Is that I can't understand good like I did in school.

It's hard to focus.
