I think online learning would work better for me if:

I knew ahead of time what the lesson was scout

no internet issues and my house was quiet.

There's no "if" it just doesn't work for me at all, Its hard to focus on doing my work when I'm in a environment with things that entertain me

There were fewer platforms to know how to log into. If my teams wouldn't mess up.

my answer for this i'd taken a lot weeks to completely not like due Friday i prefer to take a lot to work and more weeks to completely

I don't know. i want to go back to school.

i want to go back to school

It it was both online and in person.

yes

It works fine.

The school district didn't have their heads up their butts and had planned better and had listened to the good teachers who do things right for the students.

If I could get more help with my online classwork.

Everything was captioned, regular teachers would remember that I can't keep up or hear everything and I can't hear when I can't see them. Maybe with more training they could get the hang of it

There was no glitching or lagging in live video. Another things is to just assigned me to whatever homework that need to be done.

Just not have online learning.

It was easier

Make videos shorter

All students were muted

someone would sit down and teach it to me and show me slowly step by step and by not having a flood of work

if ihad my math teethrs

If your teacher couldn't remove you from the class, and everybody can be crazy!

If the captions would be better and students speak more clearly throughout meets with better microphones.

I do not wish to continue distance learning. The benefit is minimal and the work is hard

Audio not always clear

Nothing

i got to see my friends more.

Not a good fit at all

Videos teachers sent me had captions.

Teachers could post a little amount of work and actually give us an assignment that is more fun and interesting

We had more time with assignments.

I like ie better. I'm afraid to go back to school if we have to wear masks because I won't be able to speech read. Even if my teachers wear masks where I can see their faces, I won't be able to see my peers faces. It will be

I Do better In a classroom setting

I think online learning would work better for me if teachers had about the same schedule.

I understood the work more

I don't know

I got to try it.

the captioning system actually works when someone talks in a foreign language. By that ,I mean the captioning system translates what is being said in another language ,like Spanish, to English

People were always muted when they are done talking. And that they are close to their mics so I can hear them

N/A

We could use apps for hearing activities

we had extended time. like at least 2 days

we had smaller groups

If my iPad didn't glitch, it would be better.

If people who want to speak but are not able to be in a quiet setting or have a broken microphone typed in a chat rather than try to say what they want to say.

Not do it.

yes better than you

Nothing

Sessions were only 20-30 minutes.

If nothing, I prefer to be in person.

I don't know; it's been pretty good so far.

There were accurate captions on all videos and class meetings.

If everything is posted on sunday

I have no problem

I think I'm doing okay with online learning right now but I worry about other kids who aren't doing as well as me.

I think that there are a lot of depressed kids who aren't handling the isolation well. Isolation isn't really the best thing for people who are depressed. Those kids needs people to surround them and support them and getting that online isn't really the same. I also bet that a lot of people's sleeping patterns have been affected by this. It's not really healthy to have this much screen time, either, and I think that learning like this and being isolated and on devices so much is really going to affect how all kids are interacting socially. I feel like they're not going to open to their teachers or their friends or the people who support them because they're so used to being behind a screen, especially for those kids who don't have a lot of friends. They're already anti-social so this isolation isn't helping them to become more socialized. I am not speaking just for me, but from what I've seen, I'm

Not doing at all. I like it better when we are face to face and teachers can help me when i have questions.

The video quality was better.

Nothing

If a teacher came to my house and teach me

I could still be with my friends.

If all my teachers use Google Meet. Zoom doesn't work well on my computer. Only 2 of them do right now. Or, if I had a better computer.

If it wasn't so difficult and more understandable.

If I had done it the whole time, it would've kept my grade up.

There were zoom's every day for most of the day. That would make it feel more like at school

All of my teachers used captioning.

It wasn't online

There wasn't as much homework and more communication with teachers.

We keep it brief for the students and not make us to big assignments.

I think Online learning would be better for me If I set up a meeting with some of my teachers and maybe used my Phonak FM if I and my mom can get help with it where ms. faith helps me.

Online work is not as hard as I thought and I don't think that I would change anything.

there wasnt as much work and if everything was all one class put together

I could have a longer period of time to finish my work.

Teachers explained a little bit better

Exact notes for certain classes, more examples of math problems.

nothing.

I think it worked fine

I could use zoom more consistently, and if teachers had zoom classes instead of just posting assignments online

I don't need any other changes, keep it the way it is

I am completely fine with it.

Its in the best state for me now and I have no issues with anything I can change or control.

More live teaching.

I don't have an answer for this.

FYI- I am on a 504 for my hearing loss. I do not have a special ed teacher, a speech teacher or a teacher of the deaf. I did not have my FM system at home during this time. However, the teachers did not teach lessons online in person. Only games were presented during Zoom meetings.

someone in my house would help me sometimes

was shorter period of time of online learning and being able to be at the routine of being at school and back

My teacher was here with me so that I can understand better

one day assignments dont exist

there are less projects to do and more time on doing your homework. Online learning can be difficult, so that's why I prefer going to school even though I don't really like school.

I were an independent learner

on monday i have break and catch up with my missing homework

I didn't like it..

Better internet connections

I don't like it.

Make it more fun. Show more amazing videos.

Having classes start later in the day. Having more accurate captions.

There was some way I could get a little help at times I do need help

I had better on screen captioning

no technical problems, if my chromebook could annotate and use the whiteboard with zoom..now it can't. It's

I didn't have to listen to other students and teacher at the same time, especially when students didn't mute

No answer

We were able to meet with students one on one, to explain some things with the students to help them to proceed on their assignments.

I could do it all the time. My parents are looking at homeschooling me now!!! :)

Nothing changed

it stayed the same way

Schools would open again

I had my FM system. If the teacher paid attention to me.

the internet wouldn't freeze our screen at random times

If it wasn't a thing.

Some deadlines were longer.

Better connection

It would be better if we were at school

nothing

Have the same time every day. keep lessons at 30 mins then a break 10 minutes

There is really nothing.

There was more structure and class discussions seemed less awkward- I'm always afraid I'm going to interrupt someone or something if I talk.

If the teachers were better at explaining how to do things.

nothing

we could get more students to participate.

NA

I think it is fine as is!

we have any better way to chat online.

I could see my teachers in person. If I could be in school. If I could hear better and we did the same things we did in school. The stuff now isn't fun and doesn't make me learn as much

There were other students from my class attending the online session. It would be good to see the other students during my online classes.

Teachers received better training with their technological resources.

Nothing really.

Probably like consistent captioning and an interpreter available all the time.

More step by step videos explaining the assignments.

Captioning on Zoom meetings.

"Office hours" so that I could easily get help from a teacher.

closed captions on the zoom meetings

I had captioning.

There was more consistency across teachers and classes. I think having live classes where the teacher teaches the lesson would be helpful, with an option to watch the class later if we are sick or not available.

Explain more about the lessons.

My internet worked better and I could have captions. We started with google meets but had to go to zoom because the school said we could only use zoom and we couldn't have the captions.

If I could meet with all my classmates online a few times.

I could see my teacher faces and have captions

If teachers would respond to our emails, explain things more clearly, and not assign to much oh and calling parents when we don't complete ONE assignment.

I had motivation and could be with my friends.

talk to my teachers on zoom more

If there was less screen time. Otherwise i am doing well so far.

If we had less work we'd have to do on a tight due date.

instruction were person-to-person for us who rely on visual communication!!!

They make the internet faster so that I can play with other people.

The technology was better...connection.

All the assignments work the first time.

videos has captioning

If I could ask questions with the teacher online.

I could do it at school

Having classes with your friends.

I think online learning would work better if the teachers doesn't give to much work or make it harder to do.

Less work to do in a specific timeframe

If I had my FM/DM system.

If there are not alot of people in a google meet. If I can hear what they are saying what my teachers and my classmates are saying.

The classes were in the afternoon.

I would like to have live sessions that are required each day where the teacher goes through the entire lesson with the whole class. Therefore, if someone doesn't understand a concept or has a questions, they can ask it in

I think that online learning would work better if we weren't stuck at home.

There was actualy a teacher teaching in person
Recorded videos need better sound quality and captions.
stop posting so much that is not graded
better organized with posts, folders available to use in google classroom (homework, notes)
if i had a friend around and it would be better.
It would be better if I did not have so much work. Teachers send so much it is hard to stay on top of it.
If we could have specials.
I had more practice and I could read what my friends said
things work and are clear on what i have to do
I think everything went well
If the computer didn't have any problems.
I don't know
because I like it at home doing distance learning
I could call somebody for help,
If all teachers sent out a reminder of everything to do that day. Most of my teachers would do that but not all.
So that would be very helpful.
Require less work
Nothing I can think of.
If I could see and hear my teachers better. They used Zoom. There was too much background noise.
it´s okay
having more live video chats with class.
Not sure.
Nothing that I can think of. It's pretty good for me.
If I were to also get some sort of written summary. Captioning isn't reliable.
they actually taught us new things and less homework but more to study
N/A
More teachers used programs that do captions
We didn't have tech problems sometimes
You had a better system to work on.
I had all the resources I needed ahead of time or if I had more time with the assignments and do it on my pace.
If I return to school
I had captioning or a print out of notes
If all of my teachers assigned work at the beginning of the week instead of gradually.
I try my best on doing enough homework and turned in on time!
we have more time to work on homework
If we can figure out closed captioning on the bottom so I can read as I am listening. It would be better if more people would participate.
If teachers responded sooner.
Workload was lighter
The attendance questions were the same as what we would do in class.
I'm not sure
it had captions all the time
There was less work.
Everything was captioned and everything that can be typed up, is.
I think it would work better for me If I had more face time with my teachers so I could understand the work
When I talk to my friends I can talk to them on my phone so I don't really have to join class meetings. I don't think anyone feels comfortable with online class.

NA-I am happy with how it worked for me!   Regarding question #10, I do not have speech so I don't have a speech and language teacher.

nothing

Fewer assignments.

It is fine as is.

If the technology worked consistently

if they made everything more organized because sometimes it gets confusing to find my work. Sometimes I wish the messaging was a little better because it doesn't make a sound when you get a message

Nothing

I could ask my teacher questions.

#16--my teacher of the deaf did not give me any assignments or provide any online teaching. After my school closed, I did not have any interaction with the teacher of the deaf.

I don't know - nothing I can think of now.

We had captioning.

if the students could not just have the screen going (video turned off so I can't speechread whoever is talking). Captioning was available on Zoom which my school uses.

if the teacher would vomule was lorder

There were more instructions

I could have less background noise from me (outside of the house like cars, airplanes, sirens, mowing the lawn) or kids speaking when they're not muted

If we didn't have it

there wasn't as much work

Nothing would make it better.

interpreter inlaid with presentation so see on same screen

you could see all the classmates via ZOOM meeting, instead of my teacher posting a video.

reduce the amount of work given each week and more students participated in Zoom meetings each week.

good Internet

There was more structured

If I wasn't able to have a interpreter.. it should have closed captions while the teachers talking.

i want to go back to school

make everything better

I was more one-on-one with my teacher during video chat times then with the entire class.

N/A

the directions weren't so cryptic sometimes; there were smaller groups online and they were managed better.

If I could see my friends.

There were captions during our ZOOM meetings so I didn't miss anything.

 only one month - not longer

LESS ZOOM!!! AND Having one on one time with my classmates.

I was able to see you face to face.

Question#6 My teacher just posts assignment online and that it, i don't see them face to face.

N/A

easy to do

i want to go back toschool

I don't really have a good answer .

If the subject was all reading , view a lecture pre recoded with CC that could be viewed multiple times if needed .

Maybe history .

I think it would work better if I turned my phone off.

I have a online learning session with some of my teachers

If I had someone to talk to for help if needed

If Owen was able to see the teachers face at all times, in a larger area. Some of the teaching will be where he can see the teachers talking. Some is where they're watching a book being read but he's not able to see the teachers lips while she's speaking. Sometimes the teacher is visible on the screen, but the area of her is so small that it's not always helpful to Owen to have the image of the teacher there.

more caption and more face to face communication

If the captioning on google meet wasn't just a piece of crap.

If there was always closed captioning.

by having more Zoom meetings required so the teachers can actually teach a lesson online rather than

If there were more fun and interactive assignments.

I think it is fine the way it is.

I would like a better schedule - office hours were all over the place. During my other classes so I couldn't see

I had an iPad or computer for more visual.

I don't think online learning would work better for me. I definitely would rather be at school. If I had no choice to do online learning I could manage it.

There were more group meetings for each class.

Being able to see my friends more.

All teachers had a zoom call or video to tell us how to utilize tools and projects

Im not sure? I think I'm fine with online learning the way it is

If the work wasn't as intense

There were more captioning, and I had my fm with me

its okay.

Math could have more clear instructions and if they didn't restrict the learning videos on yt

It would be better if we had all of the classes on Google Meet instead of working independently.

it stop lacking sometimes

Have more sessions between me and my classroom teacher. The online learning could have been better

there was more one on one time with students

If my classroom teacher would teach us live on the computer

I could understand it better.

I don't know
